ALMOSTAKBAL
For Dental Supplies

المستقبل لمستلزمات طب الأسنان

Configuration
6 beads led lamp
Double arm rest
24V film view
Instrument silicon pad
PU cushion(0.9mm)
90° Rotation cabinet box, convenient four-hand operation
USA electric motor
German water & air tubes
Assistant control system
3 in 1 tissue box
6 in 1 foot pedal

YD-D1

Configuration:

- Streamlined chair design
- PU Cushion 1.2mm
- Double arm rest
- Stainless foot pedal tubes
- USA electric motor
- German water&air tube
- Instrument silicon pad and assistant silicon pad
- 6 in 1 foot pedal
- 024 doctor stool
- Assistant control system with silicon pad.
- 6 beads direct Led lamp
- Stainless steel foot pedal outer tube
- Import handpiece inner tubes and stainless connection
- Copper water supply pipe

1. 6 in 1 foot pedal
2. 041 luxury doctor stool
3. Assistant control system with silicon pad.
4. Casting Aluminum luxury led lamp
5. 2.2N Luxury lamp arm
6. Stainless steel foot pedal outer tube
7. Double water bottle
8. Linkage chair frame
9. Detachable casting aluminum backrest
10. 4.3" LCD display screen
11. Import handpiece inner tubes and stainless connection
12. Mirco-Fiber leather
13. Aluminum headrest
14. 9 memories programs
15. Silicon strong & weak suction
16. Package with accessories:
3-in-1 Tissue Bucket

Configuration:

1. Casting aluminum construction for assistant, cabinet box, instrument base
2. PBT injection molding filter
3. 90° Rotation cabinet box
4. pillow for head and waist
5. Double water bottle
6. 4.3" main control LCD screen with 9 memories programs
7. Stainless steel handpiece connector
8. Micro-fiber leather
9. G8 led lamp
10. 072 Dentist stool and 026 Nurse Stool
11. GL-G8 8 beads luxury led lamp
12. Double Armrest
13. 6 in 1 foot pedal
14. Square lamp arm
15. Import Noiseless motor
16. Import handpiece inner tubes
17. Stainless foot pedal tubes

Configuration:

1. Casting aluminum construction for assistant, cabinet box, instrument base
2. PBT injection molding filter
3. 90° Rotation cabinet box
4. Pillow for head and waist
5. Double water bottle
6. 7" main control LCD screen and 4.3" assistant control LCD screen.
7. 9 memories programs
8. Stainless steel handpiece connector
8. Real leather cushion
9. G8 LED lamp
10. 072 Dentist stool and 026 Nurse Stool
11. GL-G8 8 beads luxury LED lamp
12. Double Armrest
13. 6 in 1 foot pedal
14. Square lamp arm
15. Import Noiseless motor
16. Import handpiece inner tubes
17. Stainless foot pedal tubes

Water Distiller

Technical Datasheet Class B Autoclave

Commodity Parameter:

Voltage: AC 220V/110v $\pm 10\%$

Frequency: 50/60Hz

Wire plug: GB 3 cores/EN 3 cores/ American

Max Hp: 2000VA

Tank Capacity: 18/ 23L

Class No: European Class B standard

Sterilizing temperature: 134°C/121°C, 136-138 Optional

Inside Dimension: $\Phi 249 \times 450\text{mm}$

Water tank : SS304 wide open on top easy for cleaning

Display board: large LED Screen

Technical Datasheet Class B Autoclave

Technical Parameters:

Sterilization level : European Class B standard

Sterilizing temperature: standard 134°C/121°C. (136-138 °C adjustable))

Special sterilization: Killing active HV,HBV,BSE and spore,

Dry procedure: Strong vacuum drying ,the residual humidity<0.2%

Display: Widescreen LED showing time, temp and pressure and real time operation procedure.

Test: Bowie & Dick Steam penetration test, vacuum test , Helix test

Safety: EU standard Safety valve,

Lock Security: Double door locking security, convenient and users friendly..

Sterilizing record: Optional USB and printer.

Water supply system: 3L distiller water tank,3L waste water tank.

Instrument container : 5 levels with 3 mesh trays.

Both Clean water shortage alarming and waste water overloaded warning system.

Product Characters:

1. Based on the new class B of international prEN13060, have 3 pulsating vacuum, Vacuum up to -0.95Bar (-0.09Mpa). Suitable to sterilizing wrap, unwrap, solid, porous, hollow device.
2. Use imported & advanced 16-bit microprocessor, easy to operate. Most suitable for the Dept of Stomatology , Ophthalmology, Surgery and Lab.
3. With B& D test and vacuum test procedures. To test the penetrability.
4. Chamber punched by Stainless Steel (#304, thickness: 2.5mm), together with The jet type of steam generator, self-cleaning ensure the efficient sterilizing.
5. With alarm system for waste water tank, avoid the waste water to enter into the sterilizing circulation, make the sterilizing completely.
6. Precise LCD digital display and advanced self-test system ensure you get the working data freely.
7. Double lock door system for safety during operating.
8. With built-in printer .USB optional. The disinfection process data and date automatically print.

Portable Dental X-Ray

RV-210RG

Adjustable KV & Current

Ultra-low Radiation Leakage

SkY Ray

Features

- **Single-person operation:**
Designed for easy operation by a single user.
- **Portable design:**
Compact and lightweight for convenient use in various settings.
- **Adjustable imaging angles:**
Provides flexibility to adjust imaging angles for optimal results.
- **Efficient image capture:**
Enables quick and efficient capture of dental X-ray images.
- **User-friendly interface:**
Intuitive controls make it easy to operate.
- **Versatile applications:**
Suitable for a wide range of dental imaging needs.
- **Safety features:**
Incorporates safety measures to minimize radiation exposure.
- **Reliable performance:**
Delivers consistent and reliable imaging results.

Specifications

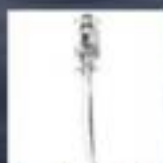

Item	Specification
Tube Voltage	60kV to 70kV adjustable
Tube Current	2.5 mA, 3.5 mA adjustable
KV Ripple Frequency	< 1%
Inverting Frequency	> 100kHz
Screen	Capacitive touch screen
Step of Exposure Time	R20 Coefficient
Exposure Time	0.01 – 1 Second

HIGH-FREQUENCY PORTABLE DENTAL X-RAY MACHINE R-RAY I

Accurate imaging: X-ray machines can produce high-quality images that allow medical professionals to diagnose and treat a wide range of conditions.

Non-invasive: Unlike other medical procedures, X-rays are non-invasive and do not require any incisions or injections.

Quick results: X-rays can provide results quickly, allowing medical professionals to make timely decisions about treatment.

DENTAL DAM

- ✓ Better Colour Contrast To Enhance Tooth Visibility
- ✓ Powder Free
- ✓ High Stretchability
- ✓ High Tear Resistance
- ✓ Endodontic treatment.
- ✓ Protect the treated area from being exposed to oral bacteria and salivary contamination.
- ✓ Prevent the patient's tongue and gums from irritation during treatment.
- ✓ Prevent any debris and or dental instruments from falling to the patient's throat.

T-ONE

- Small and cute in design and portable
- High accuracy
- Automatic calibration
- High resolution and big screen
- Adjustable viewing angle

portable, High accuracy, Automatic calibration, Large battery capacity

ENDO Motor Dolphin

Product is based on ergonomic design with a lightweight endomotor. There are 6 kinds of procedures (Memory Set) for selection. It can input the optimum data in advance, and also can modify it accordingly to the working conditions in use. Dental Contra-angle handpiece and lamp holder can withstand 135C high temperature and high pressure sterilisation. In-built high capacity lithium battery, so it can reduce battery change times and reducing costs of the machine.

Premium LIGHT BODY

- Secondary precision impression material for abutment tooth
- Inlay, Onlay, Crown and Bridge

HanFil Flow

- Excellent flow
- Low shrinkage
- High strength and polishability
- Natural esthetics shade

Han Luting Cement

- Dual cured system
- Fast and safe applications
- Self Etching and Self adhesive
- Easy clean up of excess

Premium PUTTY

- Primary impression for tray bases
- Impression for two-step techniques

HanBase Liner

- Primary impression for tray bases
- Impression for two-step techniques

Han Temp Cement NE

- Suitable bond strength
- Easy removal of the cement
- Formulated free of Eugenol
- Prevent sensitivity to cold and heat

Han Temp Cement EU

- Effect for dental pulp with Eugenol
- Suitable bond strength
- Easy removal of the cement
- Prevent leakage of oral fluids

HanTemp

- High elasticity and strength
- Easy to remove
- Tight sealing effect
- Easy application

HanFil Composite

- High strength and polishability
- Excellent handling
- Low shrinkage
- Excellent matching with natural tooth

HanFil Composite Kit

- HanFil 4g x 5 Syringes
- HanEtch 3ml x 2 Syringes
- HanBond 5ml x 1 Bottle
- Accessory : Micro brush

Core build-up

- Easy application
- Dual cured system
- High compressive strength
- High flexural strength

HanTemp Crown

- Easy handling and nice injection
- Low shrinkage
- High strength and abrasion resistance
- Protect a dental pulp

HanEtch-37

- HanFil 4g x 5 Syringes
- HanEtch 3ml x 2 Syringes
- HanBond 5ml x 1 Bottle
- Accessory : Micro brush

Han Bond 7

- No need etchant
- Light curing dentin adhesive
- Easy and fast application
- No stickiness and good flow
- 7th generation

EZ-Pass

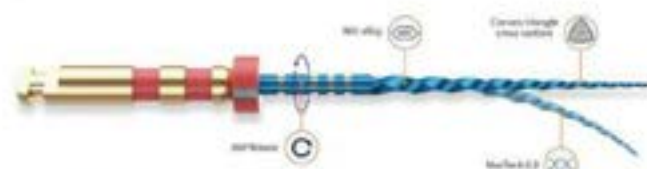

Launch of NIC EZ-PASS, the established crown-down file system. EZ-PASS is applicable to 80% regular cases.

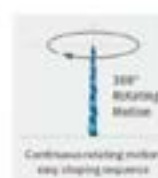

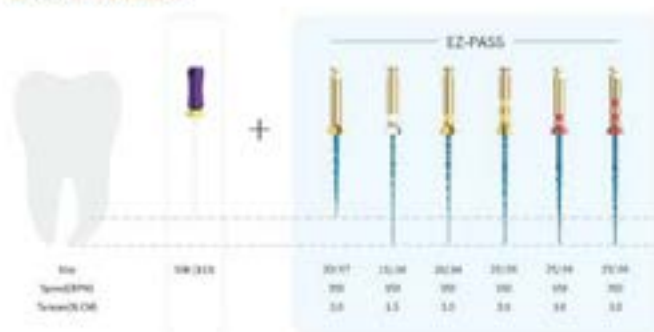

11mm 21/25/31mm

CHARACTERISTIC

- Maxitech 5.0 NiTi alloy
- Fixed tapered for easy obturation
- Curved triangle cross-section exhibits excellent centricity
- Progressive screw pitches increase debris removal and less screw in effect

OPERATING STEPS

USAGE STEPS

- Prepare straightline access to canal orifice
- Explore the canal with small size hand files (e.g. SS # file #2)
- Open 3/3 upper coronal part with opener P1 20/37
- Shape and finish the canal with P2 13/34, P3 25/34, P4 25/36, P5 25/36 respectively to reach RDS, passively by breaking
- EDTA, irrigation is recommended to be used for better result

GF File

Patented Technology
Gradient flexibility
Archimedes' spiral movement

GF File

CHARACTERISTIC

- Gradient flexibility is produced with patented technology, preventing different flexibility.
- Progressive flexibility transition from the upper to the apical.
- Depth marking area helps the file to be well centered in the root canal and effectively conduct axial force source.
- Respect natural root canal anatomy, get accurate feedback from the tip with true expression of root canal morphology.
- Sequential shaping reduce the difficulty of preparing small and curved root canals.
- One last standardized finishing file ZF 25/34 for intend to taper confirmation and precise match to GP.
