# About EPONA®

EPONA® has been a leading manufacturer of dental products since 2017. We offer a wide range of products for dentists. Our products are made from autoclavable, medical-grade material designed to meet the needs of dentists and their patients. Our products are designed to help dentists make their practices more efficient.

## Vision

We envision a future where all dentists have access to high-quality, innovative products that help them provide the best possible care for their patients. We believe our products can play a vital role in improving dental care, and we are committed to developing and manufacturing effective, environmentally friendly products.

## Mission

Epona's mission is to be the leading provider of innovative, sustainable autoclavable products for dentists, meeting their specific needs and minimizing environmental impact. Every dentist deserves the best tools and resources; we are committed to making that a reality.

# Products

---

EPONA® is committed to providing dentists with the best components. We offer a wide range of autoclavable products to choose from, and we are always working to develop new and innovative solutions. If you are looking for high-quality components for dentistry, please contact us today. We would happily discuss your needs and help you find the right products for your practice.

## Why choose our products?

---

AUTOC LAVABLE

- ✓ Lightweight and comfortable: Plastic is a lightweight, soft, flexible material and is designed to minimize discomfort.
- ✓ Durable and long-lasting: Plastic components are durable and long-lasting.
- ✓ Biocompatible: Plastic components are biocompatible, meaning that they are non-toxic and do not cause allergic reactions.
- ✓ Cost-effective: Plastic components are more cost-effective to produce than metal components, which can lead to lower costs for dentists and their patients.

# Foldable Rubber dam frame

## ( Black edition )

Rubber dam frames are used to hold rubber dams to isolate the operative tooth or teeth. Rubber dam frames are designed to be easily and comfortably placed in the patient's mouth while securely holding the dam tightly in place.

- Easy to apply and remove: Our frame folds in half for easy insertion and removal, even with gloves on. This saves you time and hassle and makes it easier to use the rubber dam on all types of patients.
- Excellent visibility: Our frame is designed to provide you with unobstructed visibility of the operative tooth and surrounding tissues.
- Comfortable for patients: Our frame is made from a soft, flexible material that conforms to the patient's mouth for a comfortable and secure fit.
- Durable and long-lasting: Our frames are autoclavable products made from high-quality materials that are designed to withstand repeated use and sterilization without any changes in their properties.

# Rubber Dam Frame

( Available in several colors )

The perfect design makes it easy to use.

Rubber dam frames are designed to be easily and comfortably placed in the patient's mouth while securely holding the dam tightly in place.

- Superior fit and comfort: Our frame is made from a soft, flexible material that conforms to the patient's mouth for a comfortable and secure fit.
- Excellent visibility: Our frame is designed to provide you with unobstructed visibility of the operative tooth and surrounding tissues.
- Easy to use: Our frame is easy to apply and remove, even with gloves on.
- Durable and long-lasting: Our frames are autoclavable products made from high-quality materials that are designed to withstand repeated use and sterilization without any changes in their properties.

# Cheek Retractor single side

( Available in several colors )

A dental cheek retractor is qualified to be flexible and comfortable and provides retraction of the lips and cheeks during dental treatments.

- **Superior fit and comfort:** Our retractor is made from a soft, flexible material that conforms to the patient's mouth for a comfortable and secure fit. Durable and long handles make it easy to use.
- **Excellent visibility:** Our retractor is designed to provide you with unobstructed visibility of the operative tooth and surrounding tissues.
- **Easy to use:** Our retractor is easy to apply and remove, even with gloves on.
- **Durable and long-lasting:** Our single-sided retractor is an autoclavable product made from high-quality materials that are designed to withstand repeated use and sterilization without any changes in their properties.
- **Single-sided design:** Our single-sided retractor provides all the benefits of a traditional cheek retractor but without bulk or discomfort. This makes it ideal for use.

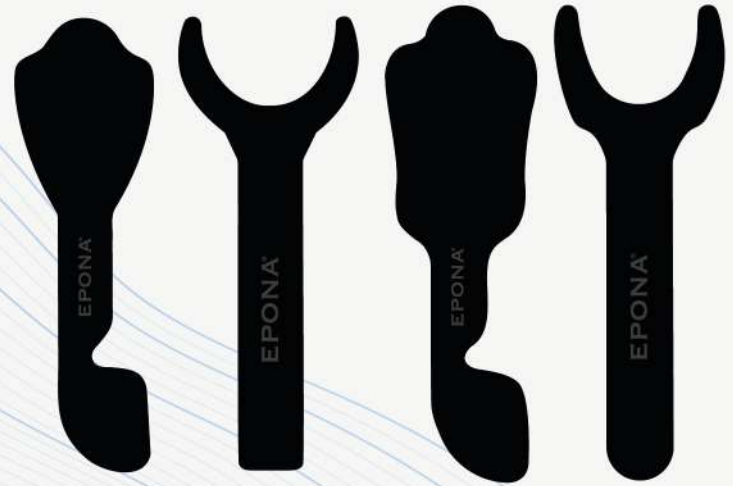

# Epona Contraster

Our contrasters for adults are specifically designed to meet the demands of professional dental photography. They help eliminate distracting background elements and highlight the details of the teeth, allowing for accurate shade matching.

## Key Features of Our Adult Contrasters:

- **Optimized Shape and Size:** Designed for comfortable and effective use in adult patients. Various shapes may be available for different photographic views.
- **High Contrast Material:** Made from an autoclavable material that provides a strong contrast.
- **Durable and Smooth Finish:** Ensures patient comfort and prevents reflections that could distort the image.
- **Easy to Clean and Sterilize:** Maintains hygiene and prevents cross-contamination.

# Cheek Retractor

Double Adult

(TRANSPARENT)

Cheek retractors are essential dental tools designed to gently hold back the cheeks, providing a clear and unobstructed view of the oral cavity.

Our transparent cheek retractors for adults are made from high-quality, biocompatible plastic, ensuring patient comfort and safety. The transparent design allows for optimal visibility of the treatment area, enhancing the efficiency and precision of dental

- **Enhanced Visibility:** The transparent material provides an unobstructed view of the oral cavity.
- **Patient Comfort:** Smooth, rounded edges minimize patient discomfort during use.
- **Durable and Safe:** Made from high-quality, biocompatible plastic.
- **Adult Size:** Specifically designed for adult patients.

AUTOCLAVABLE

## High-quality products

# Cheek Retractor

Pedo (Kids)

(TRANSPARENT & BLACK)

We know that working with children can be challenging. Young patients often have smaller mouths and shorter attention spans, which can make it difficult to perform dental procedures. That's why it's important to have the right tools on hand, such as the Cheek Retractor Small for Kids.

This cheek retractor is specifically designed for kids. It is made of a soft, flexible material that is gentle on the gums and cheeks. The retractor is also small and lightweight, so it is more comfortable for children to wear. Durable and long handles make it easy to use, and it comes in joyful colors.

Durable and long-lasting: Our retractors are autoclavable products made from high-quality materials that are designed to withstand repeated use and sterilization without any changes in their properties.

# V-Cheek Retractor

---

The V Cheek Retractor is a high-quality dental accessory designed to gently and effectively retract the cheeks during dental procedures, photography, or whitening treatments. Its V-shaped ergonomic design ensures maximum visibility of the oral cavity while maintaining patient comfort.

Made from high quality material, this retractor is autoclavable and easy to clean, making it ideal for both clinical and cosmetic use. The contoured shape provides a secure, hands-free hold, allowing practitioners to work efficiently and patients to remain at ease throughout the process.

- V-shaped design for optimal cheek retraction
- Enhances visibility and access in the oral area
- Comfortable fit for various face shapes
- Reusable and autoclavable
- Ideal for dental photography, orthodontics, and teeth whitening

# Universal Lip Retractor

The Lip Universal Retractor is a practical, all-in-one solution for retracting the lips comfortably and securely during dental and cosmetic procedures. Designed to fit universally, it adapts easily to various mouth sizes while providing clear access to the anterior teeth and gum line.

Its lightweight, flexible construction ensures patient comfort during use, while its hands-free design supports better workflow and visibility. Whether for clinical photography, orthodontics, or whitening treatments, this retractor delivers consistent performance with minimal adjustment.

- One-size-fits-all flexibility
- Enhances visibility of lips, gums, and front teeth
- Gentle, secure fit with no sharp edges
- Durable and autoclavable
- Ideal for both professional and aesthetic applications

# Endo Ruler

( Available in several colors )

The Epona Endo Ruler is a game-changer in endodontic procedures, designed to enhance accuracy and efficiency for optimal patient outcomes. This innovative tool contributes to successful root canal treatments by addressing key challenges in canal preparation and obstruction.

- **Accurate Canal Length Measurement:** The Epona Endo Ruler enables precise determination of canal length, crucial for effective cleaning and obturation.
- **Enhanced Canal Cleaning:** Accurate measurements guide thorough cleaning, removing debris and bacteria for long-term treatment success.
- **Reduced File Fracture Risk:** Precise measurements help prevent over-instrumentation, minimizing the risk of file fractures during procedures.
- **Improved Obturation:** Accurate canal length determination facilitates complete and proper obturation, ensuring a successful seal and preventing microleakage.

# Endo Ruler Ring

( Available in several colors )

The Endo Ruler Ring is a convenient and efficient tool designed to simplify and streamline the process of endodontic measurement. This innovative ring-shaped ruler offers quick and accurate measurements of files, gutta-percha points, and other endodontic instruments directly at your fingertips.

- Easy Access: Worn on the finger, the Endo Ruler Ring provides immediate access to measurement markings, eliminating the need to search for a separate ruler during procedures.
- Precise Measurements: Clearly marked increments ensure accurate length determination for files, gutta-percha, and other materials.
- Time-Saving: Quick and easy measurement at your fingertips saves valuable time during endodontic procedures.
- Convenient and Portable: The ring design is compact and portable, making it a convenient tool to have on hand.
- Durable and Sterilizable: Made from autoclavable materials for long-term use.

# Cheek – Lip Retractor

The Cheek & Lip Retractor provides clear, unobstructed access to the oral cavity during dental procedures. Its ergonomic design gently retracts the cheeks and lips while ensuring patient comfort and clinical efficiency.

- Ideal for teeth whitening and other dental treatments
- Made from high-quality medical-grade plastic
- Two-piece design with a removable tongue retractor included.
- Ultra-comfortable design for whitening and orthodontics.
- Provides maximum cheek and lip retraction
- Easy to insert and remove
- Reusable and autoclavable
- Durable and lightweight construction

2 Pcs  
in pack

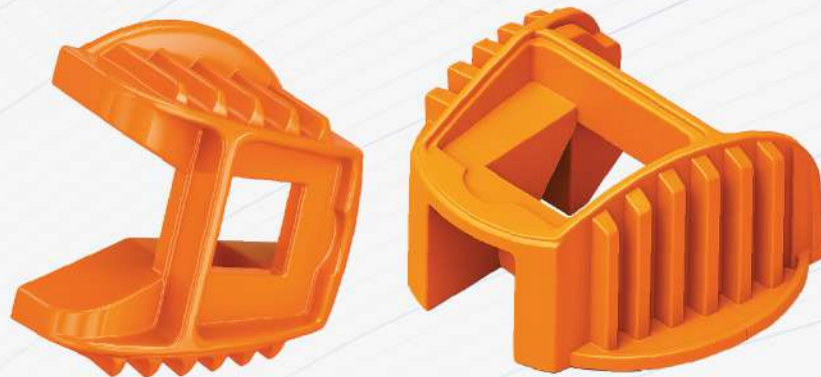

# Mouth Prop

The Mouth Prop is engineered to support comfortable and stable mouth opening during dental procedures. Its ergonomic design helps reduce jaw fatigue while allowing hands-free access, improving efficiency and patient comfort throughout treatment.

- Hands-free support for dental procedures
- Allows two saliva ejector positions: vertical & horizontal
- Designed in two sizes to suit different patients
- Helps reduce jaw fatigue
- Made from high-quality medical-grade plastic
- Resistant to high temperatures up to 121°C
- Autoclavable and reusable

# Epona Grid Box

## ( Mini Plastic Boxes )

### Box Dimensions:

length 5 cm x width 3.5 cm x Height 1.8 cm

- Dentists need a variety of tools and supplies to provide the best possible care for their patients. Mini plastic boxes connected together can be a versatile and convenient solution for many dental needs.
- Flexibility, easy use, and multi-purpose Autoclavable plastic grade that makes it used in different ways.
- You can use it to store and organize dental supplies, to dispense dental medications, and to collect and transport dental specimens.
- Make your shape with any number of boxes!  
Connect mini plastic boxes together to make your grid. They are also durable and reusable, which can help reduce waste.
- They are autoclavable products made from high-quality materials.
